## Galleries+Antiques

### Kingston Gallery

Inspired by the theories of quantum physics, "Lynda Schlosberg: The Conscious Web" captures movement and organized chaos in a series of vivid paintings on exhibit Feb. 1-26 at this SoWa gallery space. A commentary on the interconnectedness of energy, each image leaves viewers fully enveloped by the intensity and spontaneity of the art. The mass accumulation of the meticulously placed patterns and lines ellude to particulate matter and suggest a collective consciousness that the artist says is evident in "everything we think and do, no matter how big or small." Each piece is at once ethereal in aesthetic and geometrically sound in practice. 450 Harrison Ave., 617.423.4113. Map 5, G5

### Mills Gallery

Works by 13 artists, including Ingrid Burrington, Molly Dilworth, Will Gill and Steve Locke, make up "I Dread to Think..." curated exhibit, which examines the ambiguity of fear and the multifarious complexities of emotion that come from a state of paranoia.
